DISTRICT CENSUS HANDBOOK
1951

PRATAPGARH DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901/02 to 1950/51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is forty-two. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAMPUR:
October 31, 1955.

RAJESHWARI PRASAD, I.A.S.,
Superintendent, Census Operations,
Uttar Pradesh

INTRODUCTION

A—THE DISTRICT

1. The district of Pratapgarh consists of a long strip of country of varying breadth, extending for some 68 miles from the Ganga in the south-west to the Gomti in the north-east. To the north lies Sultanpur, to the north-west Rae Bareilly, to the south Allahabad and to the east Jaunpur. It is a comparatively small district of 1,457 square miles. Its population in 1951 was 11·11 lakhs. The district is divided into 3 tehsils—Kunda in the west, Pratapgarh in the centre and Patti in the east. There are 7 parganas and 11 thanas in the district.

2. The district taken as a whole is fairly level and fertile, except along the banks of the Ganga and its tributary the Daur in the south-west, the Sai and its feeder streams the Chamroura, the Parya and the Bakulahi in the centre and the Gomti in the east. The Sai has followed a too tortuous course and its neighbourhood on either side is broken, ravine-scoured, and undulating. The course of the Gomti is equally disturbed but affects only a small area on the north-eastern border. The Ganga is less aggressive and its banks are less pierced by channels and ravines. The *khadar* land or the tract under the influence of the rivers and streams is marked by light or sandy soil with *bajra* and barley as predominant crops. The rest of the district is fairly homogenous and consists of level *dumat* soil which alternates with slightly stiffer *matiar* in the depressed tracts. In the latter may be seen stretches of unculturable *usar*, but these do not extend over any considerable area. The ravine and *dumat* tracts which comprise the bulk of the district are well drained, but the depressed tract contains in places numerous large and deep *jhils*. The drainage is very defective in the western half of the district. In Kunda tehsil there is an old bed of the Ganga, called the Benti lake. In south of tehsil Patti *jhils* are again very conspicuous.

3. The natural soils of the district are *dumat*, *matiar* and *bhur*. The first contains a fair mixture of clay and sand and is easily workable. Its chief crops are wheat and barley. The second consists of stiffer soil, containing a large proportion of clay. Rice is the main crop of this soil and early rice is usually followed by gram. The third consists of light sandy land in the villages along the rivers and their tributaries. *Bajra* and barley are the chief crops. It is largely dry.

4. The figures of classification of area during the last fifty years are given in Table 2 of Part III of this volume. The proportion of area under various categories works out as follows for 1950-51 :

Particulars	Actual figures (in acres)	Percentage
Cultivated area	573,896	62·2
Culturable waste (excluding current fallow)	138,142	15·0
Current fallow	26,576	2·9
Forest	393	..
Area not available for cultivation of which :	183,577	19·9
(a) Covered with water	52,979	5·7
(b) Under sites, roads and buildings	40,260	4·4
(c) Barren	90,338	9·8

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50 a

detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

Particulars	Area (in acres)	Percentage
Total Culturable waste (A+B+C)	138,903	100
A—Area under culturable waste land not available for immediate cultivation ..	78,936	56.83
(i) Forest under any legal enactment	61	0.04
(ii) Groves	69,113	49.76
(iii) Forests of timber trees	1,013	0.73
(iv) Thatching grasses, shrubs and bushes	6,288	4.53
(v) Land kept for grazing	2,461	1.77
B—Area under culturable waste land available for immediate cultivation but which could not be cultivated	29,007	20.88
Of which due to—		
(i) <i>Kans</i> growth	24	0.02
(ii) Threshing floors	4,033	2.90
(iii) Malaria
(iv) Floods	468	0.34
(v) Lack of drains	1,418	1.02
(vi) Lack of water	14,958	10.77
(vii) Distance from <i>abadi</i>	502	0.36
(viii) Damage from wild animals	71	0.05
(ix) Other causes	7,533	5.42
C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against "B" ..	30,960	22.29

From the above it will appear that of the total area recorded as culturable waste only about 22.3 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and culturable including current fallow *per capita* works out to 66.5 cents of which 54.1* cents have already been brought under cultivation and only about 2.8 cents can be further brought under the plough after some improvements.

Climate and rainfall

5. On the whole the climate of Pratapgarh is good and fairly healthy. The cold weather is dry and bracing, although in some seasons east winds and cloudy weather are prevalent. In the hot weather westerly winds prevail and often blow with considerable strength for days at a time. In the cold weather frosts are not unknown and generally cause damage.

The average recorded rainfall for the whole district during the last quinquennium was 42.49 inches. During the last 45 years the rainfall has been less than 25 inches in only three years and has usually been over 32 inches.

Irrigation

6. Wells along with tanks, *jhils* and canals supply the irrigation in the district. Of the total irrigated area in 1950-51 the wells covered 73.4 per cent., canals 11.9 per cent. and other sources 14.7 per cent.

Crops

7. More acreage is sown under the *kharif* than under the *rabi* crops. In 1950-51 the area under *kharif* was 414,075 acres, that under *rabi* was 295,654 acres and that under *zaid* crops was 16,865 acres. The principal *kharif* crop of the district is rice and the principal *rabi* crop is barley followed by wheat and gram.

B—ANALYSIS OF THE STATISTICS

Population : General distribution and density

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita* :

Tehsil	Population (in lakhs)	Density (number per square mile)	Land area (in lakhs of acres)	Land area <i>per capita</i>
Kunda	3.86	710	3.47	0.90
Pratapgarh	3.86	884	2.80	0.72
Patti	3.39	726	2.99	0.88
Pratapgarh district	11.11	768†	9.26	0.83

*This figure also includes the area classed as current fallow.

†According to the area given by the Surveyor General it is 762.

The district though forty-fifth in order of area stands thirtieth in the State in respect of population. Its density per square mile is 768 while that of the State is only 557. It has not been inflated by the presence of large towns and even the rural density of the district is as high as 754, the density of the rural parts of the tehsils being : Kunda 705, Pratapgarh 846, and Patti 726. (*Vide* Tables A-I and E)

2. The population of the district in 1951 was 21·7 per cent. higher than what it was fifty years ago. Compared to this the increase in population of the State during the corresponding period has been 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades :

Growth of population

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	912,848	893,863	18,985			
1911 ..	899,973	882,397	17,576	-12,875 (-1·4)	-11,466 (-1·3)	-1,409 (-7·4)
1921 ..	855,130	839,119	16,011	-44,843 (-5·0)	-43,273 (-4·9)	-1,56 (-8·9)
1931 ..	906,233	887,361	18,872	+51,103 (+6·0)	+48,242 (+5·7)	+2,861 (+17·9)
1941 ..	1,041,024	1,016,812	24,212	+134,791 (+14·9)	+129,451 (+14·6)	+5,340 (+28·3)
1951 ..	1,110,734	1,084,317	26,417	+69,710 (+6·7)	+67,505 (+6·6)	+2,205 (+9·1)

Between 1901 and 1921 the population of the district recorded a decrease of 6·3 per cent. when that of the State decreased by 4·0 per cent. only. The decrease in population is partially due to influenza epidemic of 1918-19 and partially to loss in balance of migration. Since 1921 it recorded an increase of 29·9 per cent. against an increase of 35·5 per cent. in the population of the State during the same period.

The variation in the population of the tehsils during 1941—51 is shown in the marginal table.

Tehsil	Percentage variation 1941—51
Pratapgarh district ..	+6·7
Kunda ..	+4·4
Pratapgarh ..	+7·8
Patti ..	+8·2

The increase in this population of the district is well below the State average (11·8 per cent.). The increase is the lowest in Kunda as most of the emigration takes place from this tehsil.

3. Births, deaths and migration account for the trends in population growth. The following table gives the mean decennial birth and death-rates and the calculated natural increase and population growth-rates of the last three decades for the district :

Vital Statistics

	Total
<i>Mean decennial birth-rate—</i>	
1941—50 ..	15·6
1931—40 ..	23·9
1921—30 ..	28·4
<i>Mean decennial death-rate—</i>	
1941—50 ..	11·4
1931—40 ..	15·1
1921—30 ..	21·2
<i>Mean decennial rate of natural increase—</i>	
1941—50 ..	4·2
1931—40 ..	8·8
1921—30 ..	7·2
<i>Mean decennial growth-rate—</i>	
1941—50 ..	6·5
1931—40 ..	13·8
1921—30 ..	5·8

There are large omissions in the registration of births as well as deaths and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death-rates have fallen during the last decade but the survival rate is very low.

The figures of natural increase and growth-rate suggest a loss of population in 1921—30 and a gain in 1931—40 and 1941—50 on account of migration.

The average yearly mortality from various causes in the district during 1941—50 was as follows :

Causes	Number of deaths	Percentage of total deaths
Fever	10,322	84.5
Dysentery or diarrhoea ..	35	0.3
Respiratory diseases ..	58	0.5
Plague, cholera and small-pox ..	996	8.1
Others	810	6.6

As in the rest of the State 'fever' is responsible for the majority of deaths. But 'fever' covers a large number of ailments which the reporters are unable to identify. (*Vide* Table I, Part III of this volume)

Migration

4. About 93.90 per cent. of the people enumerated in the district at the census of 1951 were born there, 5.85 per cent. were born in other districts of the State, 0.20 per cent. were born in other parts of India and 0.05 per cent. were born in other countries. Of the immigrants from the districts of the State 39,626 (males 5,895, females 33,731) were from the other districts of the same natural division and 25,340 (males 2,649, females 22,691) were from other parts of the State. The sex proportion suggests that most of the migration is from the neighbouring districts and is marriage migration. Of the 1,613 (males 551, females 1,062) immigrants from the adjacent States 446 (males 146, females 300) were born in Madhya Pradesh, 397 (males 39, females 358) were born in Vindhya Pradesh, 311 (males 161, females 150) were born in Rajasthan and 258 (males 97, females 161) were born in Bihar.

Of the immigrants who have come from territories beyond India 308 (males 154, females 154) were born in Pakistan and 206 (males 125, females 81) had their birth-place in other territories. The Pakistan-born are the displaced persons who numbered 273 in the district. Of the immigrants born in other territories 159 (males 91, females 68) were Burma-born and 35 (males 30, females 5) were Nepal-born.

Of the 13 non-Indian nationals 2 were Nepalese, 1 Afghan, 2 Italians, 2 French, 3 Swedish and 3 Africans.

Unfortunately the figures of emigration are not available. On the basis of the vital statistics, however, the district appears to have lost about 12,000 persons during 1921—30 and to have gained about 50,000 persons during 1931—40 and 24,000 persons during 1941—50. (*Vide* Tables D-IV and D-VI)

Decline of cultivation per capita

5. We may now analyse the growth of population in the district during the last thirty years in relation to the growth of cultivation. The figures for the district are exhibited in the marginal table. (Figures of area shown under the census year are the quinquennial averages for the five years ending with the crop year immediately preceding the census year). It is obvious that cultivation has failed to keep pace with population. The cultivated area <i>per capita</i> has gone down from 60.0 cents in 1921 to 49.7 cents in 1951. The magnitude of the drop is about one-sixth of the 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than in 1921.				
Census year	Population	Net area sown (in acres)	Area of cultivation <i>per capita</i> (in cents)	
1921 ..	855,130	513,134	60.0	
1931 ..	906,233	518,810	57.3	
1941 ..	1,041,024	527,694	50.7	
1951 ..	1,110,734	551,474	49.7	

Double cropped area per capita

6. It may be examined whether this shortage has been compensated by an increase in yield per acre. Increase in yield can be brought about by more double cropping, more irrigation, better fertilization and better culture. The average quinquennial area sown more than once was 167,647

acres in 1921, 138,763 acres in 1931, 153,189 acres in 1941 and 154,062 acres in 1951. The figures of double crop cultivation *per capita* in cents are as below :

Particulars	Quinquennial averages for the year preceding			
	1951	1941	1931	1921
Double crop cultivation <i>per capita</i> in cents	13.9	14.7	15.3	19.6
Unirrigated double crop cultivation <i>per capita</i> in cents ..	13.4	14.3	14.3	18.6
Irrigated double crop cultivation <i>per capita</i> in cents ..	0.5	0.4	1.0	1.0

The double crop cultivation *per capita* has been steadily declining since 1921.

7. The average area irrigated in the district was 252,032 acres in 1921, 210,151 acres in 1931, 231,638 acres in 1941 and 199,573 acres in 1951. The average area irrigated more than once was *per capita* 8,692 acres in 1921, 9,405 acres in 1931, 4,603 acres in 1941 and 5,575 acres in 1951.

The figures of irrigation *per capita* are shown in the table below :

Particulars	Quinquennial averages for the year preceding			
	1951	1941	1931	1921
Irrigated single crop cultivation <i>per capita</i> in cents ..	19.3	21.8	22.2	28.5
Irrigated double crop cultivation <i>per capita</i> in cents ..	0.5	0.4	1.0	1.0

The irrigated area *per capita* has also been declining since 1921.

8. During the quinquennium 1916—21, 93.9 per cent. of the cropped area was under food crops and 6.1 per cent. under non-food crops. Thirty years after, the proportion of area under food crops has slightly increased. It was 94.8 per cent. during 1946—51 and that under non-food crops was 5.2 per cent. The proportionate area under different crops between 1911 and 1951 was as below :

Quinquennial average of		Total cropped area	Percentage of cropped area under							
			Rice	Wheat	Barley	Juar	Bajra	Maize	Gram	Others
1911—16	..	669,350	18.1	9.1	18.8	4.8	6.2	0.8	10.0	32.2
1916—21	..	664,391	20.6	9.5	17.5	4.9	6.0	0.6	8.7	32.2
1921—26	..	646,788	19.9	10.2	17.5	5.6	5.0	0.4	11.2	30.2
1926—31	..	663,917	19.8	10.0	18.9	5.6	4.7	0.6	9.7	30.7
1931—36	..	650,602	17.8	10.2	20.8	5.3	6.0	0.7	7.5	31.7
1936—41	..	684,987	18.7	9.7	18.4	4.6	5.6	0.7	8.1	34.2
1941—46	..	690,061	18.7	8.5	18.3	4.2	7.2	1.0	8.1	34.0
1946—51	..	710,688	22.3	8.8	18.9	3.9	6.0	0.9	8.1	31.1

Opium and indigo have completely gone out of cultivation. The area under opium was 10,004 acres and that under indigo 2,676 acres in 1901-02. The cultivation of linseed has declined from 1,160 acres to 241 acres and that of tobacco from 1,079 acres to 286 acres between 1901-02 and 1950-51.

9. Live-stock in this country live for a large part of the year on the by-products of agriculture supplemented by green-fodder crops. They have, therefore, to be co-related not only with the grazing available but also with the total area under cultivation which carries a major portion of supporting the cattle population. **Live-Stock, ploughs and carts**

As will appear from Table 3 of Part III the total number of cattle and buffaloes is 6.51 lakhs in 1935, 5.76 lakhs in 1944 and 6.28 lakhs in 1951.

The number of working cattle and buffaloes in the district has been increasing since 1944 and now stands at 2.86 lakhs. The number of ploughs has also increased from 1.22 lakhs in 1944 to 1.42 lakhs in 1951. This is apparently due to the progressive fractionalization and sub-division

of holdings. The number of carts have increased from 1.76 thousands in 1944 to 2.02 thousands in 1951. The average net cultivated area per plough works out to 4.0 acres in 1920 as well as in 1951 and the average net cultivated area per pair of working cattle works out to 4.0 acres in 1951 as against 3.9 acres in 1935.

Breeding cows and she-buffaloes have been increasing since 1935. Their numbers were 1.84 lakhs in 1935, 1.89 lakhs in 1944 and 2.05 lakhs in 1951. The cows and female buffaloes in milk per 1,000 of human population were about 36 and 33 respectively in 1951. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The number of sheep has been declining since 1920. They were 92.2 thousands in 1920 and now stand at 57.1 thousands. Goats have increased from 1.42 lakhs in 1944 to 1.76 lakhs in 1951.

The number of horses and ponies has been declining since 1930. Their number was 11.6 thousands in 1930 and now it stands at 7.03 thousands. Donkeys have increased from 1.8 thousands in 1944 to 2.4 thousands in 1951.

Poultry has increased from 40.7 thousands in 1944 to 47.6 thousands in 1951.

Distributed on 1,000 of human population the figures of the main categories of live-stock in 1951 are as follows :

Cattle	Buffaloes	Sheep	Goats	Poultry	Others
427	138	51	158	43	35

10. To sum up, the population of the district is growing at the biological natural rate since 1921, but on the other hand the land area *per capita*, the double cropped area *per capita* and the irrigated area *per capita* have declined. There is at the same time no evidence that the crop yield per acre has increased. The magnitude of the absolute numerical increase in relation to the practically stationary acreage under cultivation is, therefore, a great strain on the economy of the district.

Villages and towns

11. The district has 2,185 villages and 4 towns. Of the 11.1 lakhs of people who were counted at the census of 1951, 10.8 lakhs were found in the villages and 0.3 lakhs in the towns i.e., 976 people per one thousand of population live in the rural areas and 24 in the towns. The corresponding figures for the State as a whole are : rural 864, urban 136.

The rural population per inhabited village works out to 496. But the villages generally do not comprise of a single compact site. There are 8,213 hamlets in the district. The population per hamlet is 132. The medium-sized village—with inhabitants numbering between 500—2,000—is the dominant type in the district. Of the rural population 59.4 per cent. live in such villages, 31.5 per cent. in villages of population under 500, and 9.1 per cent. in villages of population between 2,000—5,000.

Towns vary in number of inhabitants even more widely than villages. Of the urban population 56.9 per cent. live in a town of population between 10,000 and 20,000 (*viz.*, Bela) and 43.1 per cent. live in towns of population under 5,000 (*viz.*, Manikpur, Pratapgarh and Katra).

Bela has registered an increase of 17.1 per cent. and Pratapgarh of 9.0 per cent. since 1941. Manikpur and Katra appear to be declining towns. They have registered a decrease of 2.0 per cent. and 11.6 per cent. respectively since 1941. (*Vide* Tables A-III and A-IV)

Occupations Livelihood pattern

12. Out of the total population of 1,110,734 (rural 1,084,317, urban 26,417) 962,089 (rural 956,664, urban 5,425) or 86.6 per cent. depend on agriculture for their means of livelihood and 148,645 (rural 127,653, urban 20,992) or 13.4 per cent. on non-agricultural sources. The following table shows the distribution of the total, rural and urban population of the district under different livelihood classes :

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	86.6	72.7	3.8	9.6	0.5	13.4	4.7	2.7	0.6	5.4
Rural	88.2	74.1	3.9	9.8	0.4	11.8	4.5	2.2	0.4	4.7
Urban	20.5	16.8	1.2	0.6	1.9	79.5	16.2	21.9	5.9	35.5

It is obvious that the district is one of the predominantly agricultural districts of the State. Here as many as 86.6 per cent. of the people depend on agriculture as against 74.2 per cent. in the whole State.

Of the total population of the district 571,965 persons (males 231,682, females 340,283) or 51.5 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 51.0 per cent. and that among non-agricultural classes to 54.9 per cent. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. 196,886 persons (males 53,345, females 143,541) or 17.7 per cent. of the population are earning dependants. Among agriculturists their proportion is 18.7 per cent. and among non-agriculturists 11.5 per cent. The remaining 341,883 persons (males 259,977, females 81,906) or 30.8 per cent. are self-supporting persons. Their proportion among agriculturists works out to 30.3 per cent. and among non-agriculturists to 33.6 per cent. Of the self-supporting persons 291,968 (males 220,907, females 71,061) belong to agricultural classes and 49,915 (males 39,070, females 10,845) to non-agricultural classes. On an average 3 self-supporting persons maintain 5 non-earning dependants.

Of the 49,915 self-supporting persons belonging to non-agricultural classes 2,737 (rural 2,555, urban 182) earn their livelihood from non-productive sources. Of the remaining 47,178 (rural 40,930, urban 6,248) self-supporting persons 2,047 (rural 1,763, urban 284) or 4.4 per cent. are employers, 8,840 (rural 6,221, urban 2,619) or 18.7 per cent. are employees and 36,291 (rural 32,946, urban 3,345) or 76.9 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to economic divisions is as follows :

Name of division	Self-supporting persons by divisions
All Industries and Services	10,000
0—Primary industries not elsewhere specified	85
1—Mining and quarrying	6
2—Processing and manufacture—foodstuffs, textiles, leather and products thereof	2,131
3—Processing and manufacture—metals, chemicals and products thereof	315
4—Processing and manufacture not elsewhere specified	1,008
5—Construction and utilities	89
6—Commerce	1,921
7—Transport, storage and communications	420
8—Health, education and public administration	878
9—Services not elsewhere specified	3,147

There is no large scale industry worth the name in the district. The principal cottage industries in the district are hemp ropes, *sutli*, ropes and *ban* of *moonj* and *bhabhar*, mat weaving and iron utensils.

13. In the district the population dependant on agriculture was 86.1* per cent. in 1951. The unfortunate fact is that the agricultural proportion has been increasing ever since 1901. It was only 76.2 per cent. in 1901, 81.9 per cent. in 1911 and 86.0 per cent. in 1921. The actual number of persons who depend on agriculture has increased from 735,612 persons in 1921 to 956,686 persons in 1951 or by 30.1 per cent. while the cultivated area has increased only by 7.5 per cent. This has resulted in progressive fragmentation and sub-division of holdings and pressure on impoverished soil. There appears to have been a gradual decline of village arts and handicrafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in dependency. The proportion of workers in the total population in 1951 was only 48.5 per cent. (agricultural 42.0 per cent., non-agricultural 6.5 per cent.) as against 61.1 per cent. (agricultural 52.7 per cent. non-agricultural 8.4 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 38.9 per cent. (agricultural 33.3 per cent., non-agricultural 5.6 per cent., in 1921 to 51.5 per cent. (agricultural 44.1 per cent., non-agricultural 7.4 per cent.) in 1951. All this is an index of unemployment and under-employment. It is only by the diversion of the population to cottage and other industries and by providing subsidiary occupations to agriculturists that the present severe disequilibrium in the economy of the district can be redressed. (Vide Tables B-I, B-II and B-III)

Variation in the livelihood pattern

*The figure includes earning dependants according to their secondary means of livelihood while the figure of 86.6 in paragraph 12 includes earning dependants according to their principal means of livelihood and hence the difference.

Houses and households

14. There were 214,013 occupied houses in the district—209,714 in villages and 4,299 in towns. That gives an average of 5,170 persons per 1,000 houses or 5.2 persons per house in the rural areas and 6,145 persons per 1,000 houses or 6.1 persons per house in the urban areas.

There were 229,666 households in the district—224,780 in the villages and 4,886 in the towns. That gives an average of 4,822 persons per 1,000 households or 4.8 persons per household in the rural areas and 5,407 persons per 1,000 households or 5.4 persons per household in the urban areas.

Census year				Persons per 1,000 households of	
				Rural population	Urban population
1921	4,414	4,301
1931	4,464	4,503
1941	4,875	4,872
1951	4,822	5,407

The marginal table shows the development in the size of the households since 1921. The rural household of 1951 is bigger than that of 1921. It has been almost stationary during 1941–51 and is smaller than the average State rural household (5.07). The urban household has also been increasing since 1921 and is bigger than the average State urban household (4.87).

Out of 4,822 persons in every 1,000 rural households 2,360 were males and 2,462 were females. There was a female excess numbering 102 in every 1,000 rural households. Out of 5,407 persons in every 1,000 urban households 2,886 were males and 2,521 were females. There was a male excess numbering 365 in every 1,000 urban households. The type of migration will account for this difference.

Information regarding the types of households and household relationships was also collected at this Census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there were 4,619 persons (males 2,358, females 2,261) in the district. The corresponding figure for the total count was 4,834.

The table below shows the distribution by size of 1,000 sample households :

Description				Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	385	424	144	47
Rural	383	425	145	47
Urban	454	371	129	46

Medium households are the dominant type in the rural areas and the small households are more numerous in the urban areas. Quite a large number of people migrate to urban areas unaccompanied by their families.

Family composition of 1,000 sample households is as follows :

						Number in 1,000 households	
A	{	Heads of households	{	Males (married) ..	642
						Males (widowers) ..	248
						Females ..	110
	{	Wives of heads of households	642	
						<hr/> 1,642	
B	{	Sons of heads of households	976	
		Daughters of heads of households	737	
						<hr/> 1,713	
C	{	Male relations of heads of households (other than sons)	460	
		Female relations of heads of households (other than daughters)	697	
						<hr/> 1,157	
D	{	Persons unrelated to the heads of households			{	Males ..	32
						Females ..	75
						<hr/> 107	
Grand Total						..	<hr/> 4,619

Sons outnumber the daughters of the heads of households. The latter leave the homes of their parents after marriage. Female relations (other than daughters) outnumber the male relations (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I).

15. In the district as a whole the sex-ratio is 1,038 i.e., there were 1,038 females to every 1,000 males. The variations among the tehsils are very small. The highest value was 1,058 in Pratapgarh and the lowest value was 1,010 in Kunda. The ratio was 1,048 in Patti. **Sex-ratio**

The ratio is smaller in the towns than in the villages. For the district as a whole the sex-ratio in the villages was 1,042 and that in towns 873.

The corresponding figure of sex-ratio for the district was 1,049 in 1921, 1,050 in 1931 and 965 in 1941.

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population separately : **Age-structure**

		Total population				Rural population		Urban population	
Age-group		Persons	Males	Females	Males	Females	Males	Females	
Infants and young children	0—4..	..	13.4	6.8	6.6	6.8	6.7	6.4	5.9
Boys and girls	5—14	..	26.7	14.0	12.7	14.0	12.7	13.7	12.0
Young men and women	15—34	..	29.9	14.4	15.5	14.3	15.6	18.9	13.4
Middle-aged men and women	35—54	..	21.7	10.6	11.1	10.5	11.1	12.1	9.5
Elderly persons	55 and over	..	8.3	3.7	4.6	3.7	4.6	4.5	3.6

It will be seen that the population is progressive. 40.1 per cent. of the population is of age under 15 and only 8.3 per cent. of it consists of elderly persons. (*Vide* Table C-II)

17. Out of every 10,000 persons in the district there are 4,949 males and 5,051 females.* **Marital status**
Among them 1,853 males and 1,402 females are unmarried. If we reckon males and females together the unmarried people are 32.6 per cent. of the population.

Of the males 37.4 per cent. were unmarried, 55.8 per cent. were married and 6.8 per cent. were widowed or divorced. Among females 27.8 per cent. were unmarried, 59.3 per cent. were married and 12.9 per cent. were widowed or divorced.

Of the married males 18.1 per cent. were of ages below 15, 41.5 per cent. were of ages 15—34, 31.5 per cent. were of ages 35—54 and 8.9 per cent. were of ages 55 and over. Among the married females 19.5 per cent. were of ages below 15, 47.9 per cent. were of ages 15—34, 27.6 per cent. were of ages 35—54 and 5.0 per cent. were elderly women.

Marriage is universal. Among males and females aged 35 years and over, 4.9 per cent. of the males and 1.2 per cent. of the females were found unmarried. Most of the females are married before they attain the age of 25. Child marriage is still prevalent. 24.0 per cent. of the males of ages 0—14 and 30.2 per cent. of the females of ages 0—14 were returned as married. (*Vide* Table C-III).

18. 99.96 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. **Languages**
Among the other mother-tongues spoken the main is Punjabi (0.03 per cent.). Of the 11.1 lakhs of people in the district only 374 or 0.03 per cent. were bi-lingual (in an Indian language). (*Vide* Table D-I).

19. Out of 10,000 population of the district the number of people belonging to different religions is : Hindus 8,925, Muslims 1,071, Sikhs 2, Christian 1 and others 1 ; of the 10,000 population in villages the numbers are : Hindus 8,986, Muslims 1,013 and Sikh 1 ; and of the 10,000 population in the towns the numbers are : Hindus 6,426, Muslims 3,437, Sikhs 71, Christians 30 and others 36. Muslims, Sikhs and Christians are generally concentrated in the urban areas of the district as is the case in other parts of the State. **Religion and special groups**

*The corresponding figures for the total count are 4,907 and 5,093.

There were 241·8 thousand persons belonging to the Scheduled Castes. Their number per 10,000 of population works out to 2,177. In villages they are 2,211 for every 10,000 and in the towns their number per 10,000 is only 786. The district had only 2 Anglo-Indians. (*Vide* Tables D-II and D-III)

Displaced persons 20. The number of displaced persons in the district at the census was 273 (males 131, females 142). Of their total population 97·4 per cent. came from West Pakistan, 2·2 per cent. came from East Pakistan and 0·4 per cent. came from the districts which could not be traced. (*Vide* Table D-V)

Literacy 21. In 1951 the percentage of male literacy was 14·6 while that of female literacy was 1·2. As compared to this the percentage of male literacy in 1931 was 5·7 and that of female literacy was 0·3*. On January 1, 1951 there were 476 primary schools in the district with an enrolment of 52,608. (*Vide* Table D-VII)

C—EXPLANATORY NOTE ON THE STATISTICS

The statistics in this volume have been presented in three parts :

I—District Census Tables

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below.

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools", from information specially supplied by District Inspector of Schools.

Processing of Census data

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

Agricultural Classes—

I—Cultivators of land wholly or mainly owned ; and their dependants

II—Cultivators of land wholly or mainly unowned ; and their dependants

III—Cultivating labourers ; and their dependants

IV—Non-cultivating owners of land ; agricultural rent receivers; and their dependants

*The numbers per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literates are as below :

Males		Females	
1951	1931	1951	1931
157	68	12	4

Non-agricultural Classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately, while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla/ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (a) *rural tracts*, comprising the rural population of each tehsil, (b) *urban city tracts*, comprising the population of areas which had been declared as cities, (c) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to “hamlets” has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a “hamlet”.

A clear distinction has been made in this census between a “House” and a “Household”. A house is any human dwelling having a separate main entrance while a household is any commensal unit living in a census house. In previous censuses the figures under “Occupied Houses” used to be that of households, while the figures under columns 7—9 of the present tables refer to occupied census houses as distinct from households.

The Economic Tables—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

- (i) Self-supporting persons ;
- (ii) Non-earning dependants ; and
- (iii) Earning dependants

These were defined in the Instructions to Enumerators as follows :

“A ‘self-supporting person’ is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be ‘self-supporting’ a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a ‘self-supporting’ person in this sense is a ‘dependant’. A ‘dependant’ may be either an ‘earning dependant’ or a ‘non-earning dependant’. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an ‘earning dependant’. A person who does not earn any income either in cash or kind is a ‘non-earning dependant’. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a ‘non-earning dependant’. Each of them should be classed either a ‘self-supporting person’ or an ‘earning dependant’ according to the share of income attributable to each. The same applies to any other business carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a housewife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such.”

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are, ordinarily, economically active with the exception of the following classes and groups :

(a) All self-supporting persons of Agricultural Class IV.

(b) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

- (i) Persons living principally on income from non-agricultural property ;
- (ii) Persons living principally on pensions, remittances, scholarships and funds ;
- (iii) Inmates of alms-houses and recipients of doles ;
- (iv) Beggars and vagrants ; and
- (v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.

An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as 'employers'.

An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobies*, *kahars* etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees".)

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age-returns and have not been smoothed.

Tables D-V (i) and (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

"A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."

PART I

DISTRICT CENSUS TABLES

A--GENERAL POPULATION TABLES

A-I—Area, Houses and Population

Serial number					Occupied houses						
	Tehsil				Area in square miles	Villages	Hamlets	Towns	Total	Rural	Urban
1	2				3	4	5	6	7	8	9
District Total	1,447	2,185	8,213	4	214,013	209,714	4,299
1 Kunda	543	686	3,437	1	80,067	79,293	774
2 Pratapgarh	437	695	2,991	3	73,185	69,660	3,525
3 Patti	467	804	1,785	..	60,761	60,761	..

Serial number	Tehsil	Population								
		Persons			Males			Females		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	10	11	12	13	14	15	16	17	18
District Total	..	1,110,734	1,084,317	26,417	545,004	530,902	14,102	565,730	553,415	12,315
